PUPPY CARE RECORD

Shot & Deworming Schedule

Puppy / litter: _____

Whelp date: _____ Puppy ID / microchip: _____

Suggested dates are NOT completed treatments. Vet must confirm this new-series plan against prior records, product labels and local law. Mark Done only after treatment; enter actual date, product/lot and initials. Cross out unneeded rows. No dose amounts or injection instructions are provided.

Deworming / parasite control

Routine care: Suggested review dates: every 2 weeks through 8 weeks, then monthly through 6 months. Vet selects wormer or preventive; do not duplicate treatments already covered by that product.

Done	Stage	Suggested	Actual date	Product / lot / route	Initials
☐	2 weeks	Vet to set			
☐	4 weeks	Vet to set			
☐	6 weeks	Vet to set			
☐	8 weeks	Vet to set			
☐	3 months	Vet to set			
☐	4 months	Vet to set			
☐	5 months	Vet to set			
☐	6 months	Vet to set			

Distemper / adenovirus / parvovirus

Core combination: Example series starting at 8 weeks: doses at 8, 12 and 16 weeks. Product may include parainfluenza. Vet may add a dose at 18-20 weeks for higher risk. Booster shown is the latest review target, not an automatic due date.

Done	Stage	Suggested	Actual date	Product / lot / route	Initials
☐	8 weeks	Vet to set			
☐	12 weeks	Vet to set			
☐	16 weeks	Vet to set			
☐	Booster review by	Vet to set			

Leptospirosis

Core: Example two-dose series at 12 and 16 weeks; confirm product. Review booster within 1 year of the actual last initial dose.

Done	Stage	Suggested	Actual date	Product / lot / route	Initials
☐	12 weeks	Vet to set			
☐	16 weeks	Vet to set			
☐	Booster review by	Vet to set			

Rabies

Legal / vet confirmation: 16 weeks is a planning placeholder only. Your vet must confirm the legal deadline and product age; an earlier appointment may be required. Keep the original rabies certificate.

Done	Stage	Suggested	Actual date	Product / lot / route	Initials
☐	Initial: confirm date	Vet to set			
☐	Next: vet to enter	Vet to set			

PUPPY CARE RECORD

Additional Vaccines & Handoff

Puppy / litter: _____

Whelp date: _____ Puppy ID / microchip: _____

Suggested dates are NOT completed treatments. Vet must confirm this new-series plan against prior records, product labels and local law. Mark Done only after treatment; enter actual date, product/lot and initials. Cross out unneeded rows. No dose amounts or injection instructions are provided.

Bordetella / kennel cough

If indicated: Example first appointment at 8 weeks, subject to product age. Oral/nasal products generally use one initial dose; the second row applies only to an injectable two-dose series. Do not give both routes as separate routine series.

Done	Stage	Suggested	Actual date	Product / lot / route	Initials
☐	Initial: confirm route	Vet to set			
☐	Injectable only: dose 2	Vet to set			

Canine Lyme disease

If indicated: Example appointments at 12 and 16 weeks, subject to selected product age and exposure risk. Recheck timing if the first dose changes.

Done	Stage	Suggested	Actual date	Product / lot / route	Initials
☐	12 weeks	Vet to set			
☐	16 weeks	Vet to set			

Canine influenza

If indicated: Example appointments at 12 and 16 weeks, subject to product age and exposure risk. Recheck timing if the first dose changes.

Done	Stage	Suggested	Actual date	Product / lot / route	Initials
☐	12 weeks	Vet to set			
☐	16 weeks	Vet to set			

Rattlesnake toxoid

Veterinarian-directed only: No universal date calculated: suitability, doses and timing depend on product, weight and exposure. Not a substitute for emergency treatment after a bite.

Done	Stage	Suggested	Actual date	Product / lot / route	Initials
☐	Vet-selected dose 1	Vet to set			
☐	Vet-selected dose 2	Vet to set			

Owner / veterinary handoff

Breeder / kennel: _____ Contact: _____

Owner: _____ Transfer date: _____

Veterinarian / clinic: _____ Phone: _____

Vet-confirmed next appointment: _____ Care needed: _____

Rabies certificate / tag no.: _____ Records attached: _____

Optional vaccines are not needed for every puppy. Have the veterinarian enter ongoing boosters and parasite prevention after this sheet. If an actual dose differs from the plan, later dates must be reviewed. This owner-maintained checklist supplements, but does not certify or replace, veterinary records.
